

WASTE STREAM TARIFFS 2025

The following Waste Tariffs are for items in excess of, or additional to the waste levels levied by the Port Authority.

PD Ports levies each vessel for the use of the waste disposal facilities provided under MS (Port Waste Reception Facilities) Regs 2003.

Under this levy, vessels may discharge an allotted volume of standard ship's generated garbage free of charge. Up to 50% of the allotted volume may be Galley waste. The quantity of allotted free of charge waste is:

- Vessels up to 1,000 GRT 1 m3
- Vessels between 1,000 and 4,000 GRT 2 m3
- Vessels over 4,000 GRT 3 m3

The allotted general garbage does not include larger items, such as pallets, furniture, sewage, scrap metals or hazardous waste. These items, along with quantities over the allotted volumes, will be charge by Svitzer Marine Limited to the vessel's owner, normally via the ship's agent.
